CR-POWER8IV

Power supply controller

CRPWR-8IV

Product overview

The CR-POWERIV is a 8 ways high current relay box, which works together with a main controller. It can be controlled via CR-NET, serial ports, and network bus. There are critical improvements for high current control. It can be used for LED lights, electric motors, and power supply switch, etc, and can control 10A/220V current on each way.

Features -

- CR-NET, serial port, and network control.
- 8 ways control.
- CR-NET bus control, support ID settings via ID dial.

Specifications

The parament name	CR-POWER8IV
Communication method	CR-NET bus, serial port, and network
CR-NET address code	ID dial
Control ways	8
Power supply	DC12V, CR-NET bus power supply
Maximum power consumption	18W/DC12V
Single way load	AC220V/10A,DC30V/10A
